## DETROIT, MICH.

### MANUFACTURING CHEMISTS

#### —Fluid Extracts.—

We manufacture a full line of fluid Extracts, both official and non-official, making a specialty of the newer additions to the materia medica. By our process we, as fully as is possible, exhaust the medicinal principles of the drug. By the strictest care taken in the selection of the crude material, and the most approved process of manufacture, operated by the highest skill, we succeed in producing fluid extracts which are unexcelled and rarely equaled for fullness and constancy of strength.

#### —Sugar-Coated Pills.—

UNIFORM AND ROUND.

Our pills are made entirely by hand, from the purest materials, and are sugar-coated by a method avoiding the use of heat above 90 degrees F., without impairing either their efficacy or solubility.

For solubility, regularity of shape and beauty of finish they are excelled by none. They are coated *while the mass is yet soft*, and will remain in same condition for years.

Special formulæ made and coated to order, when desired, in lots of 3,000 or upwards.

#### Medicated Lozenges.

Lozenges are of use in pharyngeal troubles that yield to ordinary medication. By being slowly dissolved the medicament they contain is brought into contact with the diseased mucous membranes, and hence a beneficial influence, local as well as general, is exerted. In this respect they are of inestimable value to public speakers, teachers, singers, etc., as they are handy to carry about the person. In certain diseases of children, in worms, dyspepsia, and in cases where it is desirable to carry the remedy about the person (as with travelers), the lozenge is a useful form for a medicament. We manufacture 50 formulæ.

Special formulæ made to order of any desired size, shape, color or flavor, when ordered in quantities of 3 lbs. or more.

#### Elixirs, Wines and Syrups

We desire to call the attention of pharmacists to our preparations embraced under this head.

Prepared with all the improvements which long practical experience and high medical authority can suggest, we offer them as combining with therapeutical value, agreeableness of taste and elegance in appearance.

We put them up in pounds, half-gallons and demijohns.

N. B.—When ordered simply in "bulk" these articles will be sent in half gallon bottles. If desired in four ounce, one or five-pound bottles, or in demijohns, please specify.

#### SPECIALTIES AND SUNDRIES.

Cascara Cordial.  
Sanguis Bovinus Exsiccatus.  
Liquor Ergotæ Purificatus.  
Chlor Anodyne.  
Empty Capsules.  
Lactated Pepsine.

Ethydene Dichloride  
Elixir Salicylic Acid  
Extract Malt.  
Glycerated Dialyzed Iron.  
Gurjun Balsam.  
Hydrastia (White Alkaloid of Golden Seal).  
Menthol.  
Monobromated Camphor.  
Nitrite Amyl.  
Nitrite Amyl Pearls.  
Picrate Ammonium.

Pepsine Liquid Concentrated.  
Pepsine and Lactophos. Lime Lozenges  
Pure Cold Refined Glycerated Dialyzed White Norwegian Cod Liver Oil.  
Quinine Elixir.  
Solution Sclerotic Acid.  
Sulpho-Carbolate Sodium.  
Syrup Iodide Iron.  
Yerba Santa Lozenges.  
Etc., Etc., Etc.

#### —CONCENTRATIONS.—

Our list of Concentrations comprises the proximate medicinal principles of the several plants named, either combined in the form of a powder, consisting of two or more constituents, or isolated in the form of a powdered alkaloid or resinoid. These are a very eligible form in which to administer medicines, and are highly prized by many. *Put up in ounce bottles and bulk.*

# — TONGA —

## THE FIJIAN REMEDY FOR NEURALGIA.

This remedy has been used for several centuries by the aborigines of the Fiji Islands, though introduced to the notice of the profession in England only about a year ago.

The success attending its use in the hands of Drs. Sidney Ringer and Wm. Murrell, of London, England, induced us to dispatch an agent to the Fiji Islands for the collection of a quantity of this valuable drug. Heretofore the secret of its source had been jealously guarded by the Fiji chiefs, the knowledge of its composition being handed down as an heirloom from one generation to another. Through Mr. Ryder, a resident from Fiji, a specimen of the remedy was first brought to England, with the statement that he received it from a European who had married a chief's daughter and had learned the secret from his father-in-law.

Tonga, as prepared by the Fijians, is a compound of several plants, and occurs in the form of small, loose bundles, the remedy being enveloped in a wrapper of the inner bark of the cocoanut tree.

The natives administer it in the form of an infusion, but it has been found that alcohol much more thoroughly extracts its active principles.

Drs. Ringer and Murrell base their report of the use of the drug on a sufficient number of cases, and C. Bader, ophthalmic surgeon to Guy's Hospital, says: "The results obtained by Drs. Ringer and Murrell fully coincide with mine. I have notes of cures of brain and kidney disease in which Tonga alone succeeded in removing pain. All cases of neuralgia (supra and infra-orbital branches of the fifth nerve) with swelling of the temporal veins during the attack were benefitted."

Reports from Sidney, Australia, show that Tonga has also been successfully employed as a remedy for neuralgia by the profession of that country.

The Fluid Extract can be obtained from

## LIPPIA MEXICANA.

### A NEW EXPECTORANT.

This new Mexican remedy is introduced to the medical profession of this country on the authority of Dr. A. H. Saxton, Baltimore, Md., who has communicated the results of his experience in its use in an article in the January, 1881, number of the *Therapeutic Gazette*.

The demulcent and expectorant properties claimed for the drug by Dr. Saxton are such as must commend it to the careful attention of the profession, and especially so during the season of catarrhal affections of the respiratory passages. A remedy which combines demulcent with expectorant properties, and at the same time does not nauseate, must meet with favor. The cases reported by Dr. Saxton would also seem to show the drug to be possessed of an alterative influence in the respiratory mucous membrane, which must enhance its value in those chronic affections so often rebellious to treatment.

We prepare a tincture of Lippia Mexicana and will be pleased to furnish a reprint of Dr. Saxton's article on application.

GRANULATED

## EXTRACT OF MALT.

A Pure Extract of Canada Barley Malt, WITH NO  
OTHER SUBSTANCE ADDED.

This preparation will not ferment or mould in hot weather, and can be kept on hand for use in **any climate** with safety.

Extract of Malt in the liquid form has long been known as a valuable nutriment, but has the disadvantage of not keeping well, being liable to undergo fermentation, and, in many instances, is disagreeable and nauseating to the taste.

Our Granulated Extract contains all the salts of the grain, with the sugar and nutritive properties in the natural state for digestion, and is easily assimilated even by feeble stomachs.

This Granulated Extract makes an admirable substitute for sugar in tea or coffee, and forms a pleasant and nutritious addition to porridge and similar food for the sick.

Granulated Extract of Malt is of great value to persons of impaired digestion, for infants and growing children, for those afflicted with **PULMONARY COMPLAINTS**, and for invalids or any persons who need a nutritious and easily digested diet.

WE ALSO MANUFACTURE A FULL LINE OF

**FLUID and SOLID EXTRACTS, RESINOIDS  
and SUGAR-COATED PILLS.**

# LAZELL, MARSH & GARDINER'S POWDERED MEDICINAL EXTRACTS.

Having recently enlarged and made valuable improvements in our apparatus for the preparation of Powdered Medicinal Extracts, we respectfully ask the attention of Pharmacists to the following features of this line of pharmaceutical specialties.

1st. The solid extracts are prepared from strictly pure drugs by repercolation, and only the concentrated tinctures are used for evaporation.

2d. Each officinal extract is reduced to a pilular consistence and assayed for the per centage of water contained therein.

3d. The pilular extracts are exsiccated in thin layers at a temperature not exceeding 140° F.; and special precautions are exercised with those extracts having volatile alkaloids, or active principles liable to dissociation by exposure to prolonged and high temperatures.

4th. The loss of water in drying of pilular extracts, as found by accurate assay, is compensated by the addition of sugar of milk.

5th. Our Powdered Medicinal Extracts are standardized in accordance with the strength of the pilular extracts of the U. S. Pharmacopœia, and may be prescribed in precisely the same doses.

6th. Every package emanating from our Laboratory is labeled so that the weight of the crude drug represented by each grain of the powdered extract may be seen at a glance.

Having originated this class of fine prescription preparations, and knowing the marked favor they have met with in the dispensing departments of our best Pharmacists, we do not deem it necessary to extol their merits on the score of convenience or reliability.

## POWD. EXT. BELLADONNA.

*One grain of the powdered extract represents four grains of powdered Belladonna Leaf.*

This is prepared from the officinal Alcoholic Extract of Belladonna Leaf, and has the same medicinal strength.

LAZELL, MARSH & GARDINER,  
NEW YORK.

## POWD. EXT. OPIUM.

*One grain of the powdered extract represents two grains of Gum Opium.*

This is prepared from the officinal Aqueous Extract of Opium, and has the same medicinal strength.

LAZELL, MARSH & GARDINER,  
NEW YORK.

# Recent Introductions to the Materia Medica,

—BY—

**PARKE, DAVIS & CO.**

**Manufacturing Chemists,**

DETROIT, MICH.

**CHEKEN.** (*Eugenia Cheken, Myrtus Chekan.*) This Remedy, a native of Chili, is very popular in that country, where it is employed as an *inhalation* in diphtheria, laryngitis, bronchitis, bronchorrhoea, etc.; as an *injection* in gonorrhoea, leucorrhoea, cystitis, etc.; and *internally* as an aid to digestion, to allay cough, to facilitate expectoration and to stimulate the kidneys. It is also an astringent and is said to be of great value in hæmoptysis.

Cheken (known also as Chekan and Chequen), was introduced to the profession of England through a report of results following its use in chronic bronchitis or winter cough by Wm. Murrell, M.D., M.R.C.P., Assistant Physician to the Royal Hospital for Diseases of the Chest, and Lecturer on Practical Physiology at the Westminster Hospital. Dr. Murrell's report is very favorable and he has supplemented it by private advices to us expressing great satisfaction with the drug in the affections in which he has employed it. He regards it as one of the most valuable introductions of late years and pronounces it a drug of very superior properties in the treatment of **chronic bronchitis**, acting in this affection both as an anodyne and exerting a favorable influence over the organic changes in the mucous membrane. It is certainly a remedy which merits a thorough trial at the hands of the profession of this country.

**SIERRA SALVIA.** ("MOUNTAIN SAGE.") *Artemisia Frigida.* Fluid extract of the herb. Dose one to two fluidrachms.  
**Diaphoretic and diuretic.**

The success which has attended the administration of this drug in "Mountain fever" has suggested its employment in all febrile conditions attended with suppression of the secretions of the skin and kidneys. Its action in fever seems to be two-fold, acting directly on the nervous centre, thus inducing a direct lowering of the temperature, and facilitating the radiation of the heat through diaphoresis which it stimulates. Under its use, the kidneys are also aroused to activity, and the solid constituents of the urine proportionately increased. Therapeutic tests have corroborated the opinion formed of it on theoretical grounds.

**PERSEA.** (ALLIGATOR PEAR.) Fluid extracts of the seeds. Dose 30 to 60 minims. This remedy is now for the first time presented to the profession of this country. It is introduced on the recommendation of Dr. Henry Froehling, of Baltimore, Maryland, who, while acting in the capacity of botanist and scientist to an exploring expedition in Southern Mexico, became familiar with the drug, both from reports of the natives and personal experience, as a remedy in **intercostal neuralgia**. The following extract from Dr. Froehling's report will give some conception of the nature of this remedy:

"A common experience among physicians is that some cases of intercostal neuralgia are very troublesome and obstinate, resisting almost every kind of treatment; particularly is this the case in malarial districts. In such cases I would recommend the fluid extract of Persea seed. In my own person and in every case in which I have employed it I have been highly gratified with the result. Those of my medical friends to whom I have given samples of the preparation warmly endorse my opinion of it as above and I cannot but believe that further trial of it will cause it to be regarded as a valuable addition to our list of medicines."

Dr. Froehling also mentions the fact that Persea has been employed with benefit in the expulsion of tapeworm.

**COCA.** (ERYTHROXYLON COCA.) The evidence in favor of Coca is to prove it a powerful nervous stimulant, through which property it retards waste of tissue, increases muscular strength and endurance, and removes fatigue and languor, due to prolonged physical or mental effort. While indicated in all conditions presenting these symptoms it has an especial indication in the treatment of **the opium and alcohol habits**. In these deplorable conditions it has been found to possess extraordinary properties—relieving the sense of untold bodily and mental misery which follows the withdrawal of the accustomed stimulus, thus preventing a return to the narcotic, and affording an opportunity for building up the system by the administration of restorative tonics.

We prepare Fluid Extracts of all of the above drugs.

## ATLANTA MEDICAL AND SURGICAL JOURNAL.

ESTABLISHED IN 1855.

The title of this old and well-known publication has been changed to

## ATLANTA MEDICAL REGISTER,

beginning with October, 1881.

The Editorial Department will, in future, be under the direction of DR. JAMES B. BAIRD and DR. JNO. THAD. JOHNSON.

These gentlemen are already well known to the medical profession; and, being comparatively young and possessing a taste for journalistic work, will give their time and talents to making the *Atlanta Medical Register* what it should be—the leading Medical Journal of the South Atlantic States.

The editors have already secured promises from some of our best practitioners to contribute to its pages during the coming year. The names of the contributors will be subsequently announced.

Drs. Baird and Johnson will assume editorial control of the *Register* with the October number, 1881.

REDUCTION OF PRICE.—Desiring to place the *Register* within the reach of the entire profession, it has been decided to reduce the price to \$2.50 per year.

The *Register* will still contain 64 pages of reading matter, and will be printed in large, plain type and on clear, white paper, securely bound and neatly trimmed.

Address all communications in regard to subscriptions, advertisements or any other business matter to H. H. DICKSON, Publisher, 32 Broad Street.

Sample copies of the October number will be furnished free to any Physician who will send us his name before the 20th of September; after that time we will send sample copies on receipt of 25 cents.

**H. H. DICKSON,**  
32 Broad St., Atlanta, Ga.
